

It's Time We Go ALL-IN on Sustainability and Climate Action

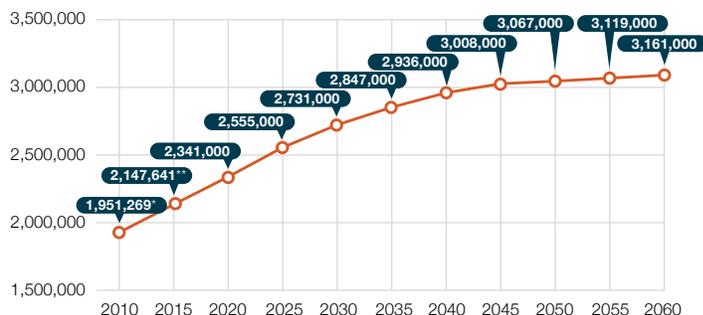

Whether you are here to celebrate, raise a family, or build your career, we all want the community of Clark County to be one thing: sustainable. A sustainable Clark County includes much more than just clean air and water. It is also more affordable housing and clean energy, diverse jobs, and a livable climate.

All-In Clark County is our action to address climate change and create a more sustainable future for all. We are moving forward with a number of assessments and planning processes that take a smart, bold, and inclusive approach to creating a sustainable community for the well-being and prosperity of all, today and for future generations.

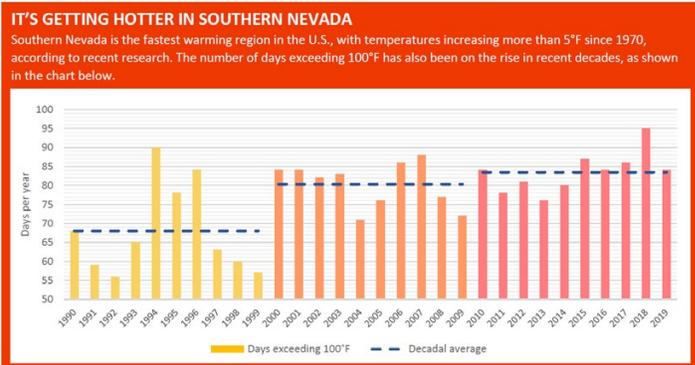

Why Now?

As Southern Nevada fights to rebuild its economy after COVID-19 and anticipates adding another 820,000 residents by 2060, we do so in the midst of unprecedented threats from climate change. This challenge demands bold action to ensure Clark County's future is healthy, livable, prosperous, and climate resilient. The good news is that all the solutions we need to endure and embrace the changes ahead exist today. With **All-In Clark County**, we are committing to a healthy, sustainable community for our current and future residents.

All-In Clark County Planning Process Timeline

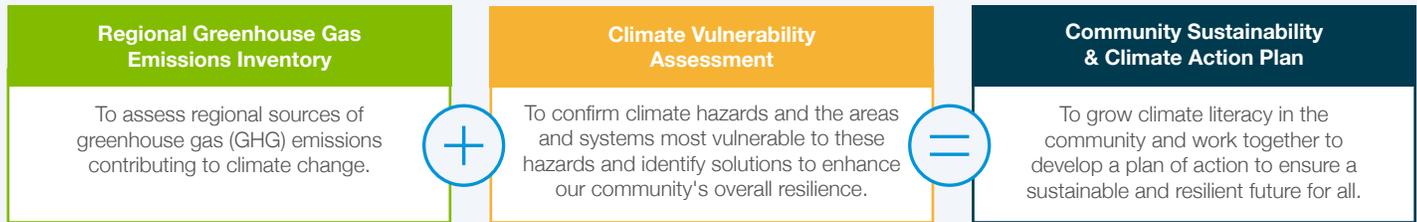

Collective Action for a Sustainable Clark County

In early 2021, the Clark County Board of Commissioners approved the *All-In Clark County* Plan for Government Operations. We are now embarking on three additional efforts under the *All-In Clark County* umbrella to continue to lead the region to a more sustainable future.

Clark County will be a national leader in:

- 1 reducing our greenhouse gases, the pollutants that contribute to climate change, and
- 2 preparing residents and businesses for climate impacts

The Greenhouse Gas Inventory and the Climate Vulnerability Assessment are foundational technical efforts that we are developing with the support of our municipalities and state and regional partners. These two efforts will provide the information necessary to develop a robust, actionable Community Plan.

ALL-IN Clark County Community Plan

The All-In Community Plan will take a comprehensive look at the opportunities to address climate change in six key areas:

Clean & Reliable Energy

Connected & Equitable Mobility

Diverse & Circular Economy

Sustainable Water Systems

Resilient & Healthy Community

Smart Buildings & Development

What does Resilience mean to Clark County?

A resilient Clark County supports residents, businesses, and visitors to be healthy, successful, and adaptable to changing climate conditions.

What does Sustainability mean to Clark County?

A sustainable Clark County balances resource efficiency, social well-being, and environmental stewardship while equitably meeting the needs of a growing community and thriving economy.

Get Involved

Clark County seeks to engage a broad and diverse set of community members in the All-In Clark County effort. With your input and support, we know our community will be able to build a more sustainable and resilient future. Through *All-In Clark County*, community members can:

- Learn more about how climate change is affecting southern Nevada
- Understand how our daily activities are contributing to a changing climate
- Engage in surveys and online and in-person activities
