

McDowell Creek Greenway, Phase 2

Mecklenburg County Park and Recreation

The natural surface trails below the Wynfield Forest subdivision will be closed to accommodate construction for McDowell Creek Greenway Phase 2, Hwy 73 to Chilgrove Lane. It is anticipated this closure will occur summer/fall 2024. New paved access trails will be provided approximately where the original wooden boardwalks were located as part of the greenway project. Greenway construction completion is anticipated for summer/fall 2025. This link will direct you to the public input page for the greenway project: PublicInput.com/McDowell

A conservation easement along the creek and wetlands was established in 2016 for the McDowell Stream and Wetland Restoration Project to preserve habitat for aquatic and local wildlife and improve water quality. The conservation easements in place require the closure of unpaved trails that are not to be paved as part of the greenway project. Signs are being provided to identify the conservation easement areas.
