

**Question/Comment:**

Regarding the International Swimming Pool and Spa Code (ISPSC), what State Law is requiring the code to be adopted?

**Response:**

Please find the respective Texas Law (Health and Safety Code) and code (TAC, Title 5) regarding the ISPSC adoption.

[HEALTH AND SAFETY CODE CHAPTER 341. MINIMUM STANDARDS OF SANITATION AND HEALTH PROTECTION MEASURES \(texas.gov\)](#) **Health and Safety Code, Sec 341.0645(a)(2) Pool Safety**  
[Microsoft Word - 25 TAC Ch 265 Sub L.doc \(texas.gov\)](#) **Ch 265.181(b) Adoption by Reference**

The City of Austin (the local regulatory authority) is required to adopt standards which are no less stringent than the 2021 ISPSC, which is the version of the code adopted by the state.

**Question/Comment:**

Are there updated timelines for when the International Building Code (IBC) amendments will be adopted, and when they will go into effect?

**Response:**

The schedule that we have so far, which you can find on our Public Input webpage (<https://publicinput.com/w3320>) is for all of the technical codes to go to Council in September and for them to be implemented January 1, 2025. There will be other engagements in May, so please stay tuned for more webinars and we will also have an in-person session for the other technical codes that are listed on the Public Input webpage. That is the timeline as of now.
